

Climate-KIC

City Finance Lab - Unlocking Climate
Finance for Cities

EIT Climate-KIC addresses the **interdependent challenges** of climate change and sustainable economic development through **strategic innovation.**

Impact Goals

Countries covered by Climate-KIC programming in 2018

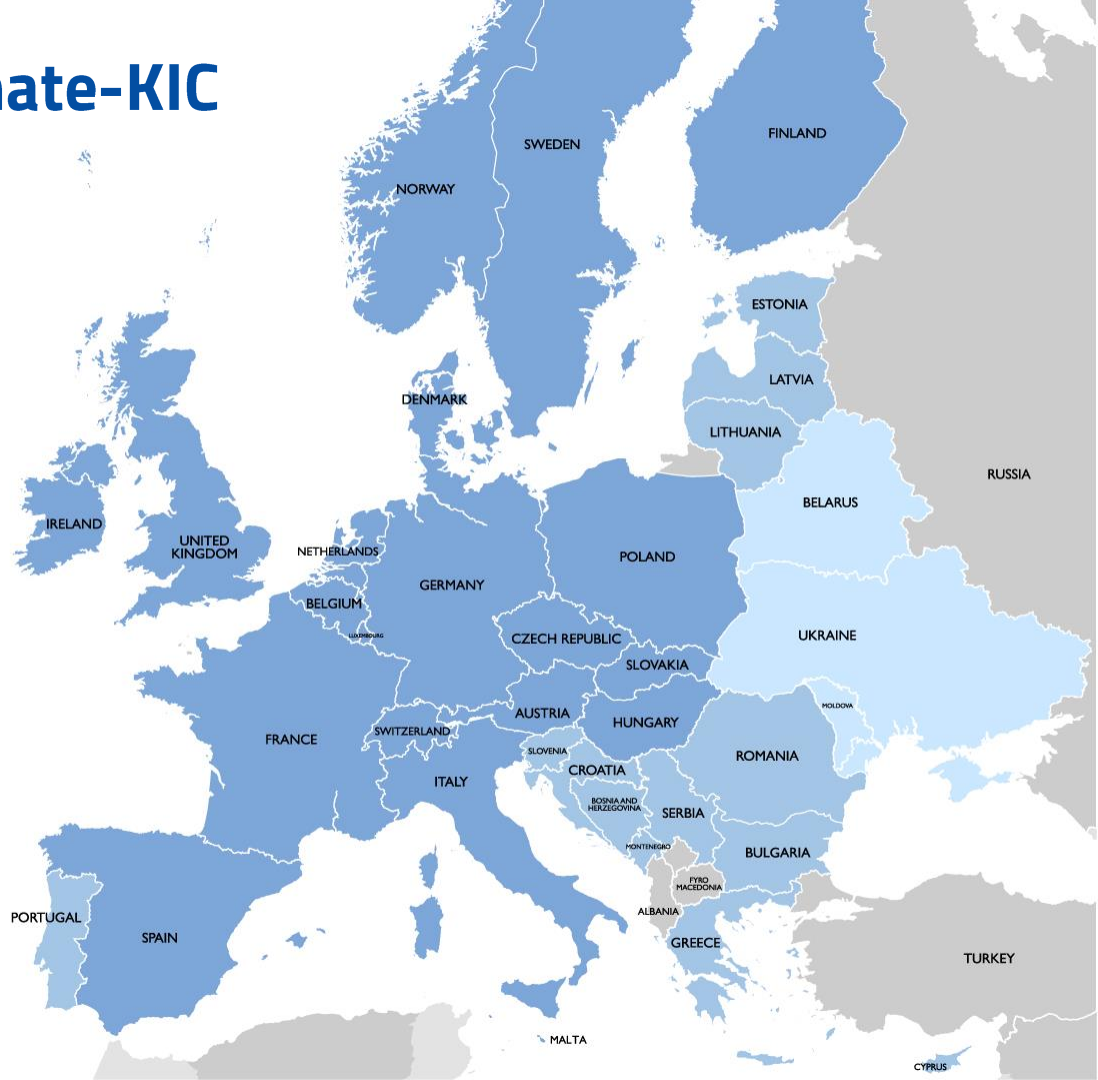

Countries covered by Climate-KIC Geographies

Countries in RIS programme

Countries covered by the LEDS Europe and Eurasia Partnership

The Community

The Low Carbon City Lab – finance for cities

Training

- Increasing municipal staff skills in project structuring
- Blended approach : digital + physical

Project preparation

- Accelerating project inception & investment decision
- Matchmaking, project preparation facilities

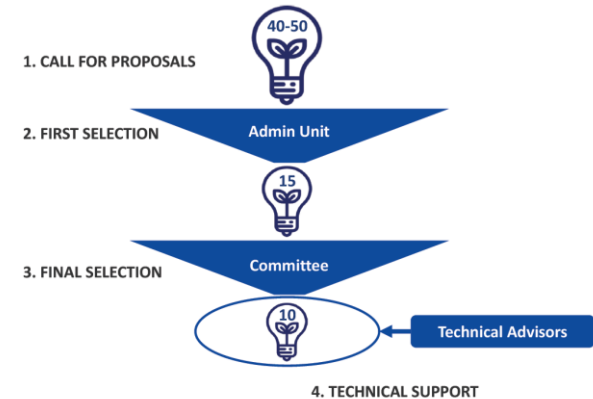

Investment

- Scouting & testing innovations
- City Finance Lab

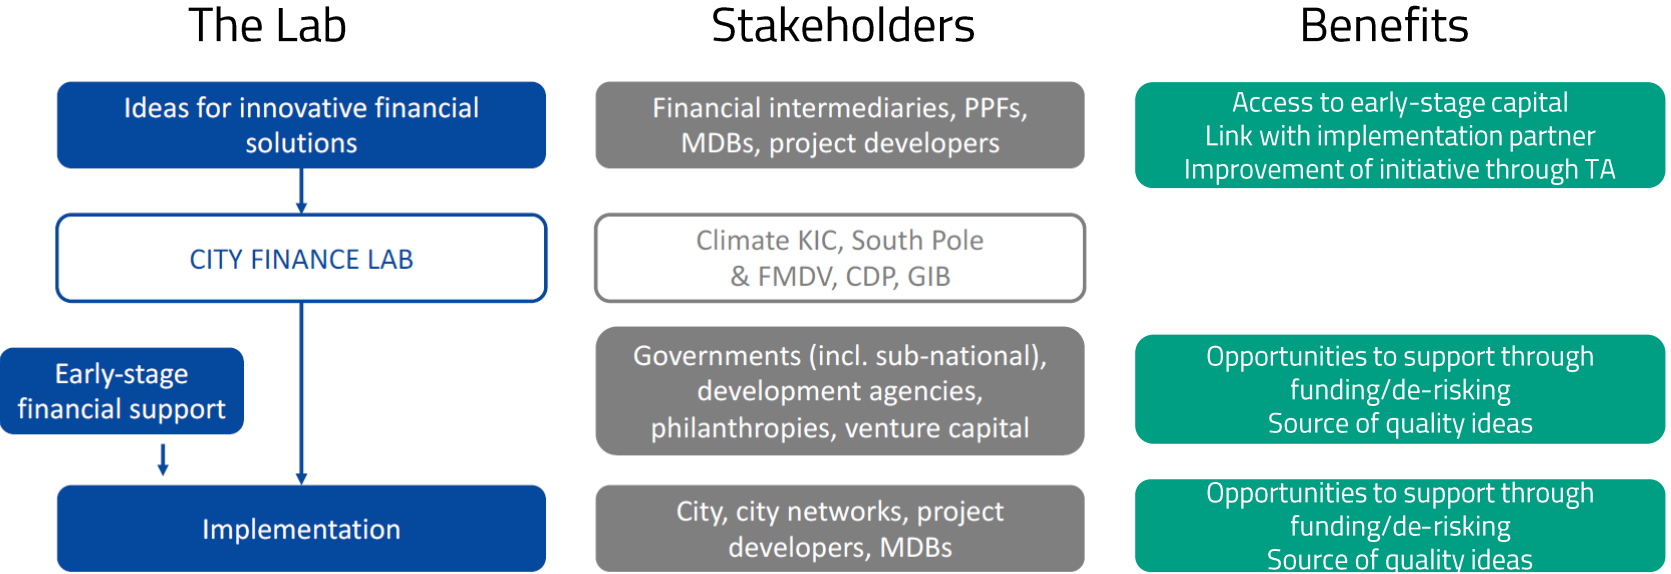

City Finance Lab

The first Finance Innovation Platform for cities in Europe

- Technical support to innovative finance mechanisms proposed by cities and developers across EU
- Open to applications until mid-July
- Once selected, idea proponents will receive face-to-face support from KIC partners from Sept to December
- Learning materials captured, actively pushed to multipliers and catalysts (e.g. EU advisors) and part of our training activities
- Looking for scaling in EU and replication in emerging economies
- <http://local.climate-kic.org/>

The City Finance Lab involves the entire finance landscape

Neighborhood Economics

Stakeholder engagement, project identification and selection mechanisms at district-level

- Support districts through the provision of a stakeholder identification and selection mechanisms, source climate projects and identify the most promising ones (bankability & climate impact)
- Malmö and Bologna actively engaged
- Already generating a pipeline for investors
- High replication potential

EU-PUBREP

Creation of Deep Retrofit knowledge and project acceleration Hubs in EU countries

- The project objective is to create a pipeline of bankable public building deep retrofit pipeline of projects
- 2018 activities comprise stakeholder engagement establishment of procurement and financing strategies for municipalities
- First batch of participating cities : Budapest, Bologna, Copenhagen, Valencia
- Challenge is to identify business models and funding sources to sustain the platforms
