Copenhagen Centre on Energy Efficiency

- is a research and advisory institution dedicated to accelerating the uptake of energy efficiency policies, programmes and actions globally
- serves as **Sustainable Energy for All** (SEforALL's) **Energy Efficiency Hub** and supports doubling the global rate of energy efficiency improvement by 2030

Key Focus Areas

Assisting policy change in countries and cities

Accelerating action through innovative delivery models

Raising the profile of Energy Efficiency

At UDP, **Rahul** focuses on undertaking comprehensive analysis and systematization of the main policy issues, conduct qualitative and quantitative studies providing expert technical advice on relevant measures, training and other direct support associated with energy efficiency in countries and cities. His role involves identifying short and long term technical and financial potential of energy efficiency implementation measures.

He earlier worked with The Energy and Resources Institute (TERI) and Climate Technology Centre and Network (CTCN) on planning, managing, implementing, monitoring and verification of climate change mitigation projects under energy efficiency and renewable energy.

Rahul is a Bureau of Energy Efficiency (BEE) Certified Energy Auditor, India. He has wide experience in accounting and mitigating GHG emissions, policy formulation and policy driven projects, evaluation of suitable energy efficient technologies for individual industries, buildings, local municipalities and national government bodies in Asia Pacific region and Latin America to support their climate change mitigation goals and enhance cost effective outcomes.

Xianli Zhu's work focuses on analysing and designing enabling policies and programmes for energy efficiency improvement and climate change mitigation. Her work focus has shifted to energy efficiency since 2015. Currently, she works on improving the transparency of climate actions in China, the monitoring, reporting and verification of district energy projects, as well as efficient cooling. She has coordinated the preparation of multiple reports and publications on best practices for energy efficiency improvement in different sectors and countries, high-impact opportunities for energy efficiency, as well as policies and potential for energy efficiency improvement in Africa. Xianli holds a PhD in Economics, and she has been working at UNEP DTU Partnership since 2006, first as an economist and then as a senior researcher.

Energy Efficiency (EE) E- training to Mozambique

Question & Answer

c2e2.unepdtu.org/kms

Question & Answer

Q1. Energy Efficiency reduction share is always the greatest compared with other. Why there is still resistance in investing in EE initiatives?

Q2.What is the most effective way to enhance people awareness toward Energy Consumption?

Q3. How policies effect long term commitments?

Question & Answer

- Q1. How the poor countries can try to solve the problems of EE in their system?
- Q2. Looks like minimum energy performance standards (MEPS) are crucial as operational policy. Can international MEPS (example from EU) be adopted in a specific country (in Africa)?
- Q3. How might different policy options affect collection of sales tax and public budgets?
- Q4. We understand that there are more benefits to energy efficiency beyond just the energy savings. How do we determine the benefits of policies and programmes?

Thank you for your attendance
